Kepada: Dadi <dadi@unigal.ac.id>

Dear Corresponding Author,
Dr Dadi
Universitas Galuh Ciamis, Indonesia

I am writing in connection with your paper entitled "**Environmental Conservation and Preservation Based on Ecology Maintance**" to Annals of Forest Research Journal Publisher: Forest Research and Management Institute ISSN:1844-8135E-ISSN:2065-2445.. recently submitted to .

I want to let you know that after carefully reviewing the content, **we cannot accept your article directly for publication**. A copy of our referee's comments, which might help you, can be found at the end of this message. Please correct it as per the reviewer's suggestion.

We are sure you will understand that we must be guided by the judgments of our academic referees.

Thank you for considering as a journal that allows publishing your work.

comments from the reviewers board:

1. The theme chosen is very interesting, but I have not seen the novelty of this article, so the author must indicate it so that this article is worthy of publication in the Journal of Annals of Forest Research
2. Literature review is not a definition description, but looking at previous research to position your research.
3. The research method has not been described in detail, therefore it needs to be described in detail up to the analysis of the data used.
4. The results and discussion have not yet been shown into research, state of art or novelty has not been foundSo, we suggest that the writer immediately improve the article.

Sincerely,

Managing Editor

Kepada: Dadi <dadi@unigal.ac.id>

Dear Corresponding Author,

Dr Dadi
Universitas Galuh Ciamis, Indonesia

Your REVIEW REPORT article titled: “**Environmental Conservation and Preservation Based on Ecology Maintance**”.

Your article's performance has improved, our reviewers still have some suggestions for improvement before your article is published.

1. In the introduction, please indicate why this research is important or urgent to do regarding the vacuum of literature, so that the position of this article is very clear as new.
2. The theory used is still general and must be made specific to explain the phenomenon under study.
3. Results and discussion need to be complemented by in-depth qualitative interpretation and comparison with previous findings.
4. The existing references are very outdated, and it is necessary to add references from the latest journals in the last 5years.
